

# Core Graphics Pack (CGP): Psychology

The comprehensive solution to conveying complex psychology images for blind and partially sighted students and their staff.

The **CGP: Psychology** has been developed to cover the BPS core curriculum by psychologists experienced in tactile graphics, in consultation with end users, lecturers and other curriculum experts.

The **CGP: Psychology** contains 54 key diagrams essential to all UK psychology degree courses in an accessible format. Teachers and students are further supported by the accompanying user guidelines and diagram descriptions, thus enabling departments to comply with disability legislation.

“This unique resource significantly benefits the teaching and learning experience of a blind or visually impaired psychology student. Every department should have one.”

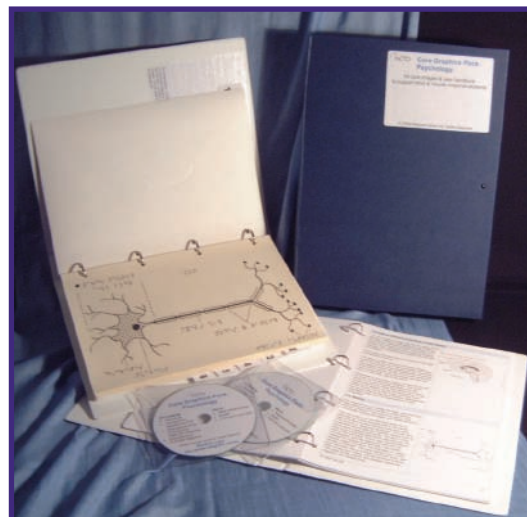

**The Higher Education Academy Psychology Network**

The **CGP: Psychology** contains:

- 33 core psychology tactile diagrams with descriptions
- 21 further diagrams conveyed through words alone
- Guidelines for both staff and students
- CD of large print diagrams and full text to read electronically, to braille, or to print in any size according to need.

**Price: £595.00 each including postage and packing. (Order Ref. TD01)**

Published by RNIB National Centre for Tactile Diagrams,  
58-72 John Bright Street, Birmingham B1 1BN.

The Disability Discrimination Act (DDA) legislation requires all education establishments to give blind and visually impaired students equal access to learning materials.

So as more such students apply for psychology courses, you need the resources to be able to answer these questions:

- Can you effectively support these students?
- What images will you need to enhance for them?
- Which images can you convey in words alone?
- Which words best describe your chosen images?
- How do you source appropriate materials?

Researched and designed by psychologists, the **CGP: Psychology** from RNIB National Centre for Tactile Diagrams (NCTD) gives you the resources you need.

**Key benefits:**

- Unique – no other generic packs available
- Immediate – avoid the delays of ordering bespoke images
- High quality – our expertise concentrated on the essentials
- Cost effective – significant savings over bespoke materials
- Flexible – suitable for many different students
- Plan ahead – anticipate current and future student needs
- Skills enhanced – learning and teaching support increased
- Easy to use – for both blind, partially sighted and sighted people
